

KINDER KIDS

Before/After Kindergarten Enrichment Program

Our Kinder Kids program is meant to add to and extend the kindergarten experience for students attending the half-day kindergarten program at Gilbertsville Elementary School. We empower kids intellectually, socially, and spiritually by providing a secure, inspiring environment.

This morning- or afternoon-only program provides a fun mix of learning, artistic expression, and physical exercise, all in a caring, faith-based setting. The children start their day with warm-up activities that develop community, launches their curiosity, and establishes a happy mood. Then they have opportunities for Thematic Exploration, where kindergartners learn about fun subjects like STEM, reading, nature, and the arts. These hands-on activities help children think critically, be creative, and enjoy learning. Of course, snack and movement breaks provide a chance to recharge and refocus.

Learning Centers will be set up so Kinder Kids can ignite their imaginations to learn academic skills while cooperatively working together. Children also get to enjoy the great outdoors through play or guided activities, where they may stretch their bodies, make friends, and learn about the world around them. Every second of our Kindergarten Enrichment Program is planned out. We provide an environment where kids learn—academically, socially, and spiritually.
